1 EXECUTIVE SUMMARY

The Asset Management Plan (AMP) is a dynamic and living document that focuses on the effective management of core assets in the Town of Cochrane, Ontario. The AMP complies with the requirements as outlined in the Ontario Regulation 588/17: Asset Management Planning for Municipal Infrastructure. It covers the following core assets:

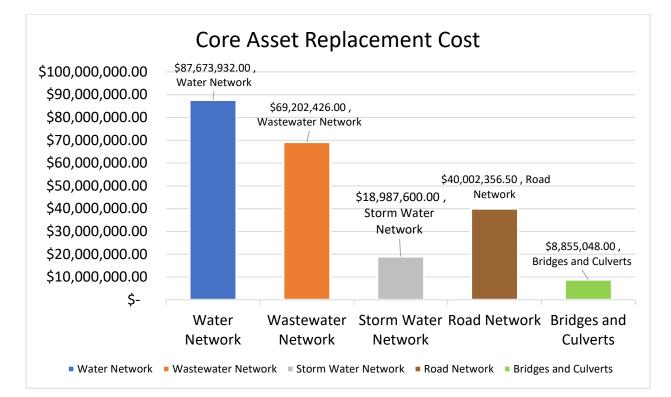

- Water Network
- Wastewater Network
- Stormwater Network
- Road Network
- Bridges and culver

The total replacement cost for these core categories is \$224.7 Million.¹ Currently, the average condition of the core assets is poor, and the Town aims to work towards infrastructure in a state of good repair or better.

¹ 2022 Cost Data

The following chart displays the total replacement cost for each core category.

Over the next 10 years, an estimated reinvestment of \$41.4 million is required for core assets. However, there is a funding gap of \$5.58 million for tax-based assets (roads, storm and bridges).

| Core Asset Category | Total | 10-Year | 10-Year Capital | Funding Gap |
|----------------------|------------------|-----------------|-----------------|----------------|
| | Replacement | Reinvestment | Plan | |
| | Value | Needs | | |
| Water Network | \$87,673,932.00 | \$5,133,893.82 | \$5,133,893.82 | |
| Wastewater Network | \$69,202,426.00 | \$12,067,650.00 | \$12,067,650.00 | |
| Storm Water Network | \$18,987,600.00 | \$613,200.00 | \$600,000.00 | \$13,200.00 |
| Road Network | \$40,002,356.50 | \$21,684,800.50 | \$16,200,000.00 | \$5,484,800.50 |
| Bridges and Culverts | \$8,855,048.00 | \$1,982,151.00 | \$1,900,000.00 | \$82,151.00 |
| Total | \$224,721,362.50 | \$41,481,695.35 | \$35,901,543.82 | \$5,580,151.50 |

To optimize investment and address the backlog of reinvestment needs, the AMP will review assets that don't require replacement within the next 10 years. Options such as pipe lining and operational work will be considered to extend the useful life of assets.

Approximately 61% of condition assessment have been completed for core assets, providing valuable data for decision-making.

The Asset Management Road Map guides the development of the AMP, ensuring compliance with the regulatory standards and facilitating efficient governance and public service. The AMP is a working and living document, continuously reviewed and updated to reflect changing needs and emerging priorities.

2 INTRODUCTION

2.1 BACKGROUND

The Town of Cochrane is a wonderfully unexpected town that supports a culturally diverse and vibrant northern way of life. This quaint northeastern municipality is situated on the Trans Canada Highway 11 surrounded by an array of lakes, woodlands, fertile soils, and mining lands. These resources are fundamental to Cochrane's economic growth and provide for a unique lifestyle.

In December 2017, the province passed the Ontario Regulation 588/17 under the Infrastructure for Jobs and Prosperity Act, 2015 to strengthen the role of asset management within the municipal planning and budgeting. As a result, every municipality was required to prepare an asset management plan for its core assets by July 1, 2022, review and, if necessary, update it at least every five years. The following is O.Reg 588/17 action plan for asset management:

| 2022 | 2024 | 2025 |
|---|--|--|
| Asset Management Plan for Core Assets with the following components: Current Levels of Service Inventory analysis Lifecycle activities to sustain LOS Cost of lifecycle activities Population and employement forecasts Discussion of growth impacts. | Asset Management Plan for Core and Non-Core Assets (same components as 2022) and Asset Management Policy Update. | Asset Management Plan for all Assets with the following additional components: Proposed levels of service for next 10 years Update inventory analysis Lifecycle mangement strategy Financial strategy and addressing shorfalls Discussion of how growth assumptions impacted lifecycle and financial. |

Building new infrastructure and maintaining existing assets in a state of good repair is critical to the success of the Town of Cochrane. Good infrastructure enhances the Town's ability to provide high quality and affordable municipal services to the Town of Cochrane residents and businesses.

This Asset Management Plan outlines the Town of Cochrane's corporate strategic plan to achieve the Town's long term infrastructure risk management goal of finding the balance between providing reliable efficient services and doing it at the lowest reasonable cost.

2.2 STRATEGIC CONNECTIONS TO ASSET MANAGEMENT

Asset Management is an integral part of the Town of Cochrane's annual, strategic and long term planning practices. Asset Management supports the strategic objectives of the Town's council, the delivery of services to the public and the sustainability for the Town of Cochrane.

2.3 ALIGNMENT WITH COUNCIL MANDATE

Vision and mission statements play crucial roles in providing guidance and setting the direction for an organization. A vision statement describes the desired future state, while a mission statement articulates the organization's core purpose and activities.

In consideration of Council's mandate and direction for 2022-2026, the following vision and mission have been developed for the AMP:

To achieve this vision and mission, the following objectives have been established:

- 1. Foster Community Engagement:
 - Develop and implement modern tools and platforms that enable active community involvement in decision-making processes and service planning.
 - Engage community task forces comprised of local expertise to understand community needs, identify opportunities, and address threats.
 - Utilize community-driven action plans and outcomes as guiding support for service development and improvement.
- 2. Implement Efficient Governance Practices:
 - Simplify processes and ensure open access to municipal government and public service, making information easily accessible to the public.
 - Establish policies and mechanisms that promote transparency, information sharing, and public participation in decision-making.

- Strive for efficient operations with streamlined processes, minimal bureaucracy, and optimal resource allocation.
- 3. Drive Sustainable Socio-Economic Development:
 - Identify and pursue innovative opportunities for social and economic growth within the community.
 - Maximize the use of community assets and resources to attract investments and promote a vibrant business climate.
 - Adopt strategic fiscal management practices to ensure responsible resource allocation and sustainable development.
- 4. Foster Valuable Partnerships:
 - Build strong relationships with provincial and federal governments to leverage external resources, investments, and funding opportunities.
 - Promote Cochrane as an attractive destination for government investment by showcasing the investments made by other layers of government.
 - Invest in intergovernmental relationship building and engage in lobbying efforts to advocate for Cochrane's interests and attract government resources.
- 5. Promote Regional Collaboration:
 - Maintain respectful and supportive relationships with neighboring municipalities, fostering a collaborative and mutually beneficial regional approach.
 - Take a lead role in regional affairs, actively participating in regional initiatives and advocating for Cochrane's interests.
 - Seek opportunities for regional support and collaboration to enhance the socioeconomic development of the entire region.

These objectives are integrated into the overall management and development of the municipality, guiding decision-making, resource allocation, and community involvement.

By achieving these objectives, the AMP supports the municipality's mandate by incorporating community engagement, facilitating efficient governance and public service, driving socioeconomic development, strengthening intergovernmental relations, and promoting regional collaboration.

An asset management plan can achieve the following mandates outlined for the municipality:

- 1. Community Engagement:
 - The asset management plan can provide modern tools and platforms that enable active community involvement in decision-making, oversight, and service planning.

- It can support a balanced approach where the municipal service plays a supportive and enabling role in community engagement, fostering a healthy allocation of community and municipal resources.
- By engaging community task forces composed of local experts, the asset management plan can incorporate community perspectives, identify opportunities, and address threats, leading to community-driven action plans and outcomes.
- The plan can facilitate effective leveraging of community resources and experiences, promoting efficiency within the municipal operation.
- 2. Municipal Government and Public Service:
 - The asset management plan can contribute to the goal of open access to municipal government and public service, ensuring that the public can easily obtain information and answers to their inquiries.
 - It can foster a culture of support and guidance, aiming to assist the community in accomplishing their goals whenever possible and practical.
 - The plan can establish policies and directions that promote transparency, information access, and operational oversight, while respecting confidentiality and competitive matters.
 - It can prioritize providing excellent public service and maintain streamlined processes with minimal steps and resources required.
 - The asset management plan can enhance the relationship between the municipal operation and governance body, emphasizing collaboration and understanding of respective roles.
- 3. Community Socio-economic Development:
 - The plan can facilitate the maximization of social and economic development opportunities within the community.
 - It can encourage exploration of innovative and forward-thinking approaches that maintain a vibrant socio-economic climate.
 - By adopting a community-building approach, the asset management plan can leverage existing assets while promoting growth, investment, and a healthy community.
 - It can support initiatives that enhance community pride, celebrate local achievements, and raise the community's profile through marketing and promotion.

- The plan can emphasize fiscally responsible management by seeking external funding, conducting thorough situational assessments, leveraging resources, and utilizing strategic financing.
- 4. Intergovernmental Relations:
 - The asset management plan can aid in building strong relationships with provincial and federal governments.
 - It can help showcase investments made in the community by other levels of government and create opportunities that attract government resources.
 - By being apolitical and supportive of the current government, the plan can encourage investment in the community.
 - It can allocate resources to develop intergovernmental relationships and engage in lobbying efforts.
- 5. Regional Affairs:
 - The plan can promote respectful and supportive relationships with neighboring municipalities in the region.
 - It can enable Cochrane to take a lead role in regional affairs, supporting mutual opportunities and regional development.
 - By positioning Cochrane as a progressive socio-economic engine, the asset management plan can enhance the community's profile and influence.
 - It can maintain Cochrane's interests while fostering a collaborative regional approach.

The AMP for core assets is a comprehensive plan that addresses infrastructure conditions, reinvestment needs, risks, and aligns with regulatory requirements. It serves as a roadmap for optimizing investments, improving asset conditions, and ensuring reliable services for the Town of Cochrane. As a working and living document, it will be continuously monitored, updated, and reviewed to adapt to changing circumstances and emerging priorities.

2.4 LONG TERM FINANCIAL PLANNING STRATEGY

The Long Term Financial Planning Strategy provides a framework through which the Town endeavors to achieve the long term financial sustainability. The Long Term Financial Plan strives to maintain a balance between three pillars: Financial Sustainability, Financial Vulnerability and Financial Flexibility.

Asset Management supports all three pillars of the Strategy:

1. Financial Sustainability

The Town's ability to provide and maintain planned service levels and infrastructure assets without unplanned increases in rates or disruptive cuts in services.

2. Financial Vulnerability

The degree to which the Town is dependent on external funding sources that it cannot control; it Is the level of risk that could impact the ability to meet existing financial obligations and commitments, including the delivery of Town services.

3. Financial Flexibility

The Towns ability to change either debt level or taxes and utility rates to meet financial obligations and ensure intergenerational equity.

2.5 CLIMATE CHANGE

Climate change will be considered as part of the Town of Cochrane's risk management approach according to regulations. This approach will balance the potential cost of vulnerabilities to climate change impacts, adaptation opportunities and mitigation approaches such as greenhouse gas emission reduction goals and targets, and disaster planning and contingency funding.

The Town of Cochrane has various projects planned that will play a key role in implementing the risk management approach such as the following:

- Consulting the Director of Protective Services regarding the Town of Cochrane's Emergency Plan and Community Safety and Well-Being Plan
- Communicating with the Director of Corporate Services regarding the Energy Management Plan

Climate change impacts will also be considered in the determination of replacement needs and costs.

2.6 THE ASSET MANAGEMENT POLICY

The Town of Cochrane Council approved an Asset Management Policy. The Policy establishes formal management controls for responsible stewardship of capital infrastructure.

The Asset Management Policy is implemented through the Asset Management Strategy.

The key guiding principles for infrastructure priority setting, planning and investment of the SAM policy are the following:

1) Fiscal Responsibility

- 1. Consider practices, interventions and operations that aim to reduce and/or optimize lifecycle costs (LCC)
- 2. Make decisions that are balanced between costs, risks, service levels, and health and safety
- 3. Identify infrastructure priorities in accordance with applicable policies and common practices
- 4. Consider funding sources and fiscal plans in decision-making
- 2) Community Consideration
 - 1. Clearly define levels of service (LOS)
 - 2. Enforce AM practices to maintain community confidence
 - 3. Support transparency by making decisions based on publicly available information and enhancing methods of communication
 - 4. Promote social and economic benefits intended to improve community well-being such as the following:
 - i) Job creation
 - ii) Training opportunities
 - iii) Economic competitiveness
 - iv) Public space improvement
 - v) Accessibility for persons with disabilities
 - vi) Enhancing health and child care
 - 5. Ensure consistency in providing core public services and critical assets
 - 6. Consider interrelationship opportunities between assets as opposed to in a standalone manner
- 3) Proactive and Forward Thinking
 - 1. Take a long-term view while considering political, economic, social-cultural, technological, legal, and environmental (PESTLE) trends in the region
 - i) Take into consideration current and anticipated changes to regulatory factors
 - ii) Minimize the impact of infrastructure on the environment, such as:
 - (1) Maintain ecological and biological diversity
 - (2) Create resilience to effects of climate change
 - (3) Make use of acceptable recycled aggregates
 - 2. Consider alternative practices, services, and innovative technology

1.7 Operations and Maintenance Activities

The value an asset provides to service happens during its operation throughout its lifecycle. Standard Operating Procedures are in place to extend the life of the assets by ensuing that they are meeting legislative requirements, and that they are operating safely and with the least amount of wear and tear.

Maintenance is routinely performed to ensure assets meet their intended life, as well as monitoring the condition and performance compared to standards.

Planned restorative maintenance activities extend the service life of the asset. Minor repairs such as replacement of parts and patching minor defects save capital expenditures by preventing more serious damage to assets.

Ongoing Operations and Maintenance activities are considered in Lifecyle Strategies, as they are essential to ensuring that assets are owned at the lowest cost. Opportunities to better operate and maintain assets are explored through continuous improvement processes.

Operations and Maintenance costs will be captured within Service Plans and will continue to be analyzed and optimized as business processes are improved and new tools, such as the Asset Management System, are implemented.

3 ASSET MANAGEMENT REINVESTMENT PLAN

3.1 THE TOWN OF COCHRANE INFRASTRUCTURE

This Asset Management plans only covers core assets. Non-core assets will be integrated in 2024.

What Infrastructure Does the Town of Cochrane Own?

The Town owns and operates infrastructure assets including:

- Road Network
- Bridges and Culverts
- Sanitary Sewer Network
- Water Network
- Storm Water Network
- Buildings (non-core)
- Fleet (non-core)
- Machinery and Equipment (non-core)
- Furniture and Fixtures (non-core)

These assets support the Town in providing a variety of services to the community.

This plan breaks down the asset portfolio according to the service that is responsible for managing the assets.

The replacement, rehabilitation, and enhancement of assets is primarily funded through either property taxes or the utility rate.

The asset management services supported by Utility Rates are:

- Water Network
- Sanitary Sewer Network

The assets managing services supported by the Property Taxes are:

- Roads Network
- Storm Water Network
- Buildings
- Fleet
- Bridges and Culverts
- Machinery and Equipment

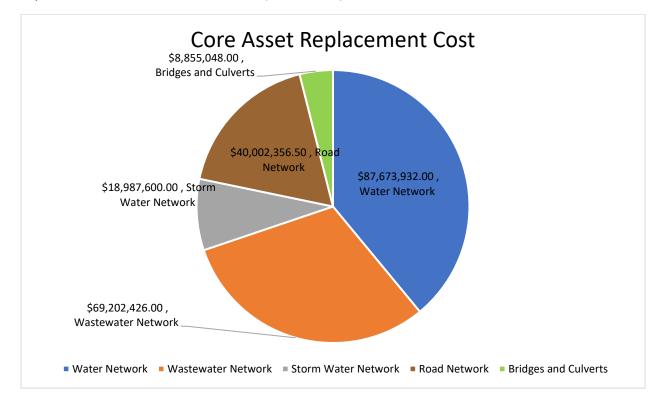

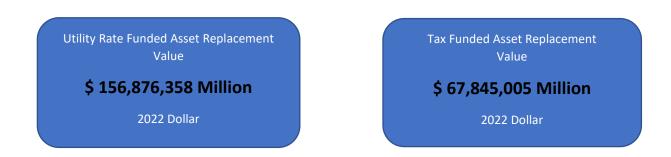

• Furniture and Fixtures

3.2 VALUE OF THE INFRASTRUCTURE

What would the Infrastructure Cost to Replace?

The Town of Cochrane's portfolio of directly owned infrastructure has an estimated replacement value of \$ 224.7 Million (2022 value).

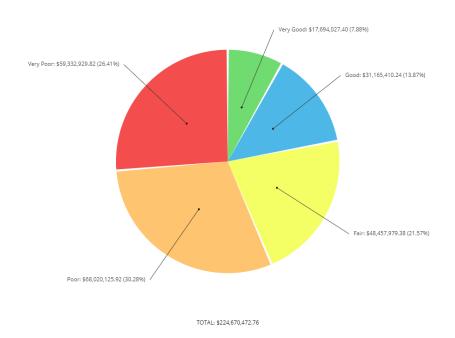

Currently, the Asset Management Plan covers the majority of the Town of Cochrane's Infrastructure under the services mentioned above. As part of the ongoing improvement of

asset management and as more asset information becomes available, the Plan will be expanded to cover additional infrastructure.

3.3 STATE OF THE INFRASTRUCTURE

What is the Condition of the Infrastructure?

The Town's goal is to strive to maintain its infrastructure in a State of Good Repair or better. As infrastructure ages, its condition grade will decrease. Reinvestments in the assets will improve the grade. There are cases where the condition of specific types of assets can degrade further because the risk to service does not increase significantly and the Town can realize cost savings for the taxpayers.

How is the Condition Graded?

When the condition of individual assets are assessed, a wide range of techniques are used to evaluate the Infrastructure of the Town of Cochrane.

Very Good – New or like new condition

Good- In a good state of repair

- Fair Some non-critical defects; some critical repairs in the near term
- Poor Some critical defects; many critical repairs in near term

Very Poor - Many critical defects; immediate repair or replacement required.

3.4 10 – YEAR INFRASTRUCTURE REINVESTMENT PLAN

What is the plan?

| Forecasted 10 Year Reinvestment Needs | \$ 41,481,695.32 | | | |
|--|------------------|--|--|--|
| Reinvestment in the 10 Year Capital Plan | \$ 35,901,543.82 | | | |
| | | | | |

Values are in 2022 dollars

Reinvestment requirements of \$ 35,901,542.82 are forecasted for the next 10 years to maintain the infrastructure. \$ 17,201,543.82 of this will be funded through Utility Rates and \$18,700,000.00 will be required to be funded through Property Taxes. The Town will also look for alternative funding sources and grants to assist with the Town's Financing.

4 FINANCING PLAN

4.1 INFRASTRUCTURE REINVESTMENT FINANCING STRATEGY

The effectiveness of an asset management plan is dependent on the integration with financial planning and long-term budgeting. The development of a comprehensive financial plan will allow the Town of Cochrane to identify the financial resources required for sustainable asset management based on existing asset inventories, desired levels of service, legislative requirements and projected growth requirements.

4.2 UTILITY RATE SUPPORTED INFRASTRUCTURE FINANCING PLAN

| Forecasted 10 Year Reinvestment Needs | \$ 17,201,543.82 |
|--|------------------|
| Reinvestment in the 10 Year Capital Plan | \$ 17,201,543.82 |
| Values are in 2022 dollars | |

4.3 TAX RATE SUPPORTED INFRASTRUCTURE FINANCING PLAN

| Forecasted 10 Year Reinvestment Needs | \$24,280,151.50 |
|--|-----------------|
| Reinvestment in the 10 Year Capital Plan | \$18,700,000.00 |
| | |

Values are in 2022 dollars

4.4 RISKS TO FINANCIAL PLAN

4.4.1 Population Growth

Intensification of populated areas – In order to promote better use of lands and services, there is greater emphasis on intensifying the use of populated lands. Although this is a prudent method to better utilize lands and services the construction of infrastructure to accommodate growth in such areas can lead to higher initial capital costs and the need to prematurely replace infrastructure which may not have reached its full life span.

Expanding into un-serviced lands – The Town of Cochrane's future growth requires the urbanization of lands. Such expansions require the extension of water, wastewater, roads, and storm management to accommodate the added population. The expansion of infrastructure to accommodate these services as well as the increase in distance to provide services will create added pressures in terms of operating and maintaining the Towns expanded network.

The Growth Plan for Northern Ontario (2011) is an economic development plan, an infrastructure investment plan, a labour market plan, and a land-use plan which is intended to guide decision making in Northern Ontario for the next 25 years. The Official Plan responds to the Growth Plan by:

- Designating areas for local economic opportunities and housing;
- Supporting small businesses through provisions for home based businesses and home industries;
- Providing for roads and community infrastructure to help the community function effectively;
- Protecting key environmental resources from alteration and development;
- Accommodating the diverse needs of all residents by encouraging different housing types, including secondary dwelling units and garden suites;
- Fostering partnerships with other levels of government
- Seeking the participation of Aboriginal communities in the preparation of the Official Plan and its implementation;
- Providing a local framework to assist in the implementation of regional economic plans and
- Identifying key natural resources for long term use.

The design population of 7,400 has been adopted for the Plan in order to reflect the direct and indirect growth effects associated with anticipated economic development opportunities in the region, particularly those associated with gold exploration and mining. This represents an anticipated increase of 1,760 people (1.3% annual growth) over the Planning Area population of 5,640, as recorded in the 2011 Census. It is acknowledged that mining and other resource activities are cyclical; therefore monitoring of the actual growth patterns over the time horizon of this plan will be essential.²

4.4.2 Ongoing Condition Assessment Program

Detailed asset condition assessments are completed annually for certain assets. The results of these assessment assist with rating the condition of the assets to improve capital planning. We plan to complete risk assessments for the assets that have not been assessed yet.

4.4.3 Weather and Climate Change Impacts

Increased infiltration and inflow due to significant weather events and aging infrastructure. Additionally, the risk of damage to assets from significant weather events is increasing. Future increased capital reinvestment to mitigate these damages will be required.

² Official Plan Cochrane and Suburban Planning Area, Consolidation December 10th, 2018

4.4.4 Economic Conditions

Changes to economic conditions can impact the Financing Plan Specific risks to the plan include:

- Increase in labour costs
- Increase in energy costs
- Increases in debt serving costs
- Decreases in grants and subsidies

Significant changes to the broader economic conditions may also impact service delivery and demand.

4.4.5 Regulatory Impacts

Changes to regulations to the Town of Cochrane's operational have significant impact on financial plans and may change:

- What services are provided by the Town
- The content of the Town's capital asset portfolio
- The availability of funding sources
- Design and construction
- Technology requirements
- Operational practices

4.4.6 Changes to Level of Service Targets

Levels of Service guide the reinvestment plan for Asset Management. Levels of Services are regulations approved by council set for each category of assets. As regulations change, levels of service will require changes to meet needs of the community. Council may change level of service to align with their vision and mission as a council. New council is elected every 5 years with new visions for the community.

5 ASSET MANAGEMENT ROAD MAP

The Town of Cochrane priority is to establish a detailed Asset Management Plan and ensure our asset details represent a true image of the Town's assets. The Themes for each year of this Roadmap and sample projects are defined below:

Phase 1(Year 1): Organization of Asset Management

- Data Analysis evaluate the validity of our asset inventory. Ensure we have collected information for all the required attribute fields. Conduct a gap analysis for missing information.
- Condition Assessment have a clear representation of the state of all our assets. We need to ensure we repair/replace at the appropriate time.

- Skills & Competency provide continuous training for employees responsible for AM. Increase communication of AM regarding policies and procedures for AM to all directors. Define the roles in AM, responsibilities and competencies and add to staff job descriptions.
- AM Policy Create AM policies for the Town of Cochrane.
- Improve record keeping and capture knowledge from staff.

Phase 2 (Year 2):Levels of Service

- Define life cycle investment requirements
- Create measures to monitor our asset performance
- Evaluate and Document lifecycle practices how to optimize our assets.
- Develop detailed AM plan for all critical assets.

Phase 3 (Year 3): Advanced AM: Evaluation

- Develop Risk Analysis evaluate risk of failure and create risk management framework to assess each asset.
- Set critical assets
- Create inspection schedules to update the condition on assets.
- Create strategic plan to prioritize assets

Phase 4(Year 4): Optimize Decision Making: Improve Capital Planning

- Link Finance with AM create standard criteria for all assets to evaluate importance of the budget.
- Optimize expenditures and financial plan create decision trees regarding risk and life cycle strategies.
- Update AMPs using new data, risk, and other improved AM practice results
- Recreate roadmap to establish continual improvement of the AM.

The following is an action plan developed in our Strategic Policy that coincides with the regulated requirements in O.Reg 588. The O.Reg was updated after the SAM policy was created and same dates have been revised.

| ACTION PLAN | | | |
|---|--------------------|---------------|--------------|
| Tasks | Person Responsible | Target Date | Deadline |
| Prepare and present SAM Policy | Champion | Jun 25, 2019 | Jul 01, 2019 |
| Approve SAM Policy through by-law | Council | July 16, 2019 | Jul 01, 2019 |

6 ASSET MANAGEMENT WATER NETWORK

6.1 STATE OF THE INFRASTRUCTURE WATER SUPPLY

40 km of Water Main

433 Main Valves

203 Hydrants

| Category | Unit Price | Total |
|----------|-------------|-----------------|
| | | Replacement |
| | | Cost |
| Water | \$ 2,100/m | \$86,489,692.60 |
| Mains | | |
| Main | \$ 865.98 | \$ 374,969.34 |
| Valves | | |
| Hydrants | \$ 3,986.55 | \$809,269.65 |

2022 Dollars Based on current project prices

The Town of Cochrane continues to produce safe drinking water to our consumers however our infrastructure is starting to age. The water infrastructure is in a poor state due to its age.

The Town is proactively identifying how the infrastructure can be enhanced to mitigate the risk of extreme cold events causing water main breaks and will require future investment to mitigate these risks.

Proactive pipe replacement programs are in place to keep the water system safe and reliable for homes and industries.

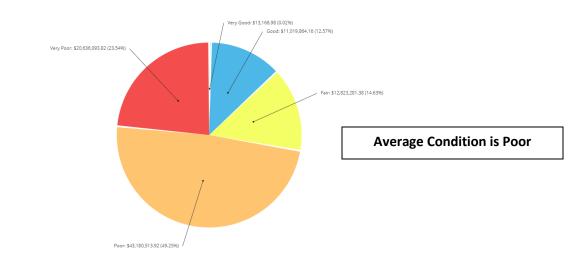

The average age of the water network is calculated based on the known in service date. Below indicates the average age of the water network by category:

Water Mains - 41 Years Old

Main Valves- 41 Years Old

Hydrants- Limited installation date exist for hydrants. Condition would be the deciding factor in replacing or rehabilitating hydrants.

6.2 CONDITION OF THE INFRASTRUCTURE

How is the Condition Graded?

Water mains are scored on the following scale for condition:

| Very Good | d Dina | segment ha | c minor dof | octo, failuro | unlikalı in | the forecas | abla futura |
|-----------|--------|------------|-------------|---------------|-------------|-------------|-------------|
| | і гіре | segmentina | s minor der | ects, failure | uninkely in | the loresee | able future |

Good Pipe segment has minor defects; pipe unlikely to fail for at least 20 years.

Fair Pipe segment has moderate defects; deterioration may continue at a ten to twenty year time frame.

Poor Pipe segment has severe defects; risk of failure within the next five to ten years.

Very Poor Pipe segment has failed or will likely fail within the next five years; require immediate attention.

The condition of the water mains is based on age and the assessed condition based on number of water breaks on the section of pipe. We plan to complete a leak detection assessment within the next two years to adequately assess the conditions of the mains.

Hydrants and Main Valve conditions are age based. We plan to complete an inspection for these water appurtenances by the end of 2024.

- 6.3 TARGET CUSTOMER LEVELS OF SERVICES
 - Meet all regulated drinking water quality standards.

- Provide 24/7 uninterrupted supply.

-

- Water system designed for maximum day plus fire flow or maximum hour pressure.
- All new services a minimum of 19mm; Watermains a minimum of 150mm in diameter.
- Maintain existing watermain assets in a good asset condition.

6.4 INFRASTRUCTURE REINVESTMENT PLAN WATER SUPPLY

10 Year Reinvestment⁴

| Forecasted Needs | Capital Plan ⁵ | Gap ⁶ |
|------------------|---------------------------|------------------|
| \$ 5,133,893.82 | \$5,133,893.82 | \$0 |

Operations and Maintenance Expenses

⁶ This figure represents the difference between Forecasted Needs and Capital Plan, provided that the Town continues to adhere to its 10-year capital plan. To forecast needs, a number of options will need to be considered. Such options may include: alternative lifecycle costs (e.g. lining mains before complete replacement is required), new technology, new and creative revenue streams to offset costs, potential government funding, combining projects for cost efficiency and other. The Town plans to complete a leak detection program to better evaluate the water main infrastructure.

³ Red hydrant indicates a water flow capacity of fewer than 500 gallons per minute (GPM).

⁴ Values are based off 2022 costs.

⁵ The Town of Cochrane is prepared to provide between \$250K to 300K per year for water capital needs funded by utility rates, reserves, debt and government funding. Based on the Water Financial Plan 2021-2026, The Town is working towards 100% capital funding through own source by 2026, reducing the need for long-term debt by 2026, and 0% annual special funding by 2026. In addition, the Town plans to maintain a water and wastewater reserve of \$ 2M. The Town plans to spend up to \$5M by 2032 consideration of those goals.

| Annual Expenditure | % of Revised Needs |
|--------------------|--------------------|
| \$ 168,700.00 | 3.29% |

10 Year Reinvestment

Capital reinvestment of \$5M is planned over the next 10 years to maintain the infrastructure and bring to a state of good repair.

Operations and Maintenance Expenses

Operation and Maintenance expenses of approximately \$ 169K per year or 3.29% of asset replacement needs are incurred to operate the water distribution and treatment systems and conduct maintenance activities on the assets. The costs are considered part of whole lifecycle strategic development and will continue to be optimized as asset management information and technology improve. Operational and Maintenance activities include valve exercising, hydrant flushing and inspection, valve replacement, watermain repairs, leak detection and service repairs.

Lifecycle Costs

Some water networks are eligible to be lined instead of going through a complete reconstruction. Lining could be up to 50% less expensive than replacement due to its less invasive process and will be considered as part of the lifecycle strategies development process.

7 ASSET MANAGEMENT SANITARY SEWER NETWORK

7.1 STATE OF THE INFRASTRUCTURE WASTEWATER

29.9 km of Wastewater Mains

380 Manholes

Total Asset Replacement Value

| Category | Unit Price | Replacement |
|------------|------------|---------------|
| | | Cost |
| Wastewater | 2,100/m | \$ |
| Mains | | 64,452,426.00 |
| Manholes | \$ 12,500 | \$4, 750,000 |

\$69,202,426.00

2022 Dollars based on current project prices

The wastewater infrastructure is currently in a very poor condition; however, the infrastructure is aging and beginning to impact the Town of Cochrane wastewater collection system.

The Town is proactively identifying how the infrastructure can be enhanced to mitigate the risk of backups into homes and businesses.

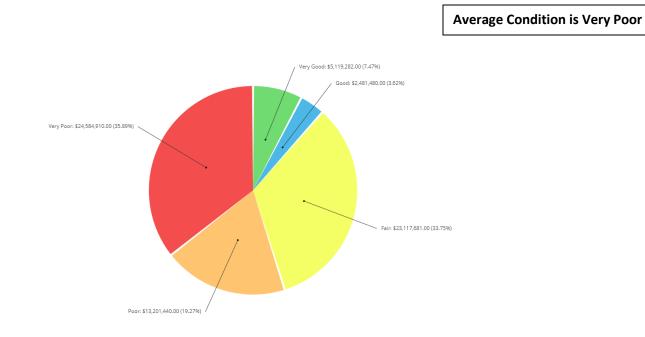

The average age of the Wastewater Network is calculated based on the in service date. Below indicates the average age of the wastewater network by category:

Wastewater Mains - 46 years old.

Manholes - 46 Years old

7.2 CONDITION OF THE INFRASTRUCTURE

How is the Condition Graded?

Wastewater mains are scored on the following scale for condition:

Very Good Pipe segment has minor defects; failure unlikely in the foreseeable future.

Good Pipe segment has minor defects; pipe unlikely to fail for at least 20 years.

Fair Pipe segment has moderate defects; deterioration may continue, at a ten to twenty year time frame.

Poor Pipe segment has severe defects; risk of failure within the next five to ten years.

Very Poor Pipe segment has failed or will likely fail within the next five years; require immediate attention.

The condition of the sanitary mains is based on age and the assessed condition based on the 2016 CCTV report for the section of pipe.

Manhole conditions are age based. We plan to complete an inspection by the end of 2024.

- 7.3 TARGET CUSTOMER LEVELS OF SERVICES
 - Meet all regulated wastewater quality standards.

- Minimize the number of sewer backups that occur due to Town's infrastructure failures.
- Minimize the number of emergency sewer bypass events that occur.
- Protect human health and natural environment.
- All new sanitary sewer designed per D-5 guidelines, 200 mm minimum size.
- Maintain existing sanitary assets in good asset condition.
- Repair critical sections of sewer identified in CCTV assessment.

| Service attribute | Community levels of service (qualitative descriptions) | Technical levels of service performance |
|-------------------|--|---|
| Scope | 1.Providing adequate Sanitary wastewater services to the community | 1.Percentage of properties connected to the municipal wastewater system. |
| Reliability | 1.Providing wastewater services with minimal interruptions | The number of events per year where combined sewer flow in the municipal wastewater system exceeds system capacity compared to the total number of properties connected to the municipal wastewater system. |
| | | 2. The number of connection-days per year due to wastewater backups compared to the total number of properties connected to the municipal wastewater system. |
| | | 3. The number of effluent violations per year due to wastewater discharge compared to the total number of properties connected to the municipal wastewater system. |
| | | 4. % of preventative maintenance activities completed on schedule. |
| | | 5. # of blocked sewers/100km length per year |
| | | 6. % of flushing/total length |
| | | 7. # of inspections per maintenance hole in a two year period |
| | | 8. # of locations with odour control devices. |

| | | 9. % of I & I |
|-----------------|------------------------------------|--|
| Cost Efficient | 1.Providing wastewater | 1.Operating budget for wastewater services |
| | services in an efficient manner | 2.Collection reinvestment rate |
| | | 3.Treatment reinvestment rate |
| Environmentally | 1.Providing wastewater | 1. # of primary bypass events without primary |
| Conscious | services that have | treatment |
| | minimal impacts on the environment | 2. # of secondary bypass events |
| | | 3. # of system overflows |
| | | Total volume of untreated wastewater discharged into the natural environment via pumping station overflows |
| | | 5. % compliance with all applicable regulatory requirements |
| | | 6. % BOD removal |
| | | 7. % Suspended solids removal |
| | | 8. # of days discharging safe treated effluent |
| | | 9. Energy consumption kW/ML for collection |
| | | 10. Energy consumption kW/ML for treatment |

7.4 INFRASTRUCTURE REINVESTMENT PLAN WASTEWATER NETWORK

10 Year Reinvestment ⁷

| Forecasted Needs | Capital Plan ⁸ | Gap ⁹ |
|------------------|---------------------------|------------------|
| \$ 12,067,650.00 | \$12,067,650.00 | \$0 |

Operations and Maintenance Expenses

| Annual Expenditure | % of Revised Needs |
|--------------------|--------------------|
| \$ 35,770.00 | 0.30% |

10 Year Reinvestment

Capital reinvestment of \$12M is planned over the next 10 years to maintain the infrastructure and bring to a state of good repair.

Operations and Maintenance Expenses

Operation and Maintenance expenses of approximately \$36K per year or 0.30% of asset replacement needs are incurred to operate the wastewater collection and conduct maintenance activities on the assets. The costs are considered part of whole lifecycle strategic development and will continue to be optimized as asset management information and technology improve. Operation and Maintenance activities include sanitary sewer flushing, manhole inspection and repairs, CCTV inspections (10-15 years) and sewer line repairs.

⁹ This figure represents the difference between Forecasted Needs and Capital Plan, (provided that the Town continues to adhere to the 10-year capital plan. To address the Town's backlog and forecasted needs, a number of options will need to be considered. Such options may include: alternative lifecycle costs (e.g. lining mains before complete replacement is required), new technology, new and creative revenue streams to offset costs, potential government funding, combining projects for cost efficiency and other.

⁷ Values are based off 2022 costs.

⁸ The Town of Cochrane is prepared to provide between \$750K to 1.5M per year for water capital needs funded by utility rates, reserves, debt and government funding. Based on the Water Financial Plan 2021-2026, The Town is working towards 100% capital funding through own source by 2026, reducing the need for long-term debt by 2026, and 0% annual special funding by 2026. In addition, the Town plans to maintain a water and wastewater reserve of \$ 2M. The Town plans to spend up to \$12M by 2032 consideration of those goals.

Lifecycle Costs

Some sanitary networks are eligible to be lined instead of going through a complete reconstruction. Lining could be up to 50% less expensive than replacement due to its less invasive process and will be considered as part of the lifecycle strategies development process. The Asset Management Software indicated a significant backlog due to age and condition. Staff will review the assets and remove assets that do not require replacement in the next 10 years based on additional information such as number of breaks, potential climate change effects, material, condition and other.

8 ASSET MANAGEMENT STORM WATER NETWORK

8.1 STATE OF THE INFRASTRUCTURE STORM WATER NETWORK

13 km of Storm Water Mains

512 Catchbasin

| Category | Unit Price | Replacement |
|-------------|------------|---------------|
| | | Cost |
| Storm Water | \$1,200/m | \$ 15,278,400 |
| Mains | | |
| Catchbasins | \$7,500 | \$3,840,000 |

Total Asset Replacement Value

\$ 19,118,400.00

2022 Dollars based on current project prices

The storm water infrastructure is currently in very good condition; however, the infrastructure is aging and beginning to impact the Town of Cochrane storm water network.

The Town is proactively identifying how the infrastructure can be enhanced to mitigate the risk of backups of stormwater onto the roadways.

The average age for the storm water network is calculated based on the in service date. Below indicates the average age of the storm water network by category:

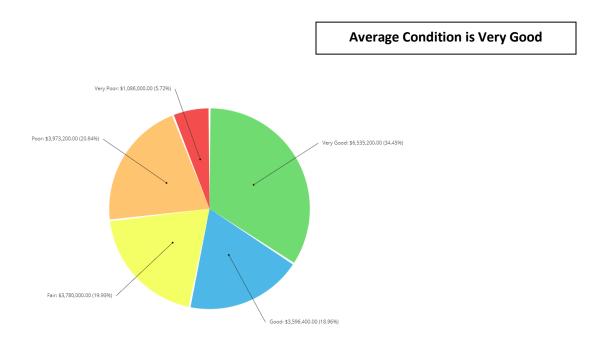

Storm Water Mains - 36 years old.

Catchbasin – 36 years old

The Town of Cochrane's records for the Storm water network assets are limited and inaccurate, which will affect the average condition of this asset category. Further detailed inspection is required to provide higher confidence in condition rating.

8.2 CONDITION OF THE INFRASTRUCTURE

| | How is the Condition Graded? |
|--------------|--|
| Very Good | New or like new condition |
| Good | In a good state of repair |
| Fair | Some non-critical defects; some critical repairs in the near term |
| Poor | Some critical defects; many critical repairs in near term |
| Very Poor | Many critical defects; immediate repair or replacement required. |
| The conditio | n for the storm water network is based on age of the nine. We plan to complete a |

The condition for the storm water network is based on age of the pipe. We plan to complete a CCTV inspection of the pipes within in the next 2 years to adequately assess the conditions of the mains.

The Town of Cochrane's records for the Storm water network assets are limited and inaccurate, which will affect the average condition of this asset category. Further detailed inspection is required to provide higher confident in condition rating.

8.3 TARGET CUSTOMER LEVELS OF SERVICES

- Level of protection established based on nature of are drained.
- Minimize the amount of silt entering the Town's storm system and sedimentation into the surrounding lakes.
- All stormwater infrastructure assets should be maintained in state of good repair.

| Service attribute | Community levels of service (qualitative descriptions) | Technical levels of service Measure |
|----------------------|---|--|
| Scope | 1. Providing stormwater services that protect the community | Percentage of properties in municipality resilient to a 100-year storm. Percentage of the municipal stormwater management system resilient to a 5-year storm. |
| Cost Efficient | 1.Providing stormwater services in an efficient manner | Dperating budget for stormwater services Stormwater Conveyance Reinvestment Rate Stormwater Management Reinvestment Rate |
| Reliable | 1.Providing stormwater services with minimal impact to the community | % of stormwater conveyance assets in poor or very poor condition % of stormwater management assets in poor or very poor condition % of minor system with insufficient capacity to convey flows of a 5-year wet weather event km of network CCTV inspected annually % of catchbasins total inspected and cleaned annually Flood prevention – complete a current list of inspections on isolated, high risk flooding locations % of inspections & routine maintenance carried out on inlets/outlets annually |

8.4 INFRASTRUCTURE REINVESTMENT PLAN STORM WATER NETWORK

10 Year Reinvestment ¹⁰

| Forecasted Needs | Capital Plan ¹¹ | Gap ¹² |
|------------------|----------------------------|-------------------|
| \$ 613,200.00 | \$600,000.00 | \$13,200.00 |

Operations and Maintenance Expenses

| Annual Expenditure | % of Revised Needs |
|--------------------|--------------------|
| \$ 105,000.00 | 17.12% |

<u>10 Year Reinvestment</u>

Capital reinvestment of \$613K is planned over the next 10 years to maintain the infrastructure and bring to a state of good repair. To bring all assets to a similar state, the Town will need to work towards bridging the \$13K gap as further explained in note 12.

Operations and Maintenance Expenses

Operation and Maintenance expenses of approximately \$105K per year or 17.12% of asset replacement needs are incurred to perform maintenance activities on the assets. These costs are considered a part of whole lifecycle strategies development and will continue to be optimized assets management information and technology improve. Operations and Maintenance activities include flushing catchbasins and lines, repairs to catchbasin structure/frame and mains, inspections, CCTV inspection (10-15 years) and thawing system in the winter.

Lifecycle Costs

Some assets can benefit from operational work that could extend its useful life as opposed to full reconstruction. In the long run, annual treatments may be less expensive and invasive and will be consider as part of the lifecycle strategies development process.

¹⁰ Values are based off 2022 costs.

¹¹ The Town of Cochrane is prepared to provide between \$50K to \$150K per year for storm capital needs funded by tax rates, reserves, debt and government funding. This considers the Town's goal to reach a \$3M general capital infrastructure reserve balance, less reliance on government funding, and increase use of annual surplus. Please note this includes a total of 400K in loan requirements,

¹² The 10 Year Reinvestment needs does not include the replacement cost of the catchbasin structure. We have inaccurate age data for the catchbasins and a condition assessment has not been completed.

9 ASSET MANAGEMENT ROAD NETWORK

9.1 STATE OF THE INFRASTRUCTURE ROAD NETWORK

| 35 km of Paved Roads | | | |
|-----------------------------|-------------------------------|-----------|------------------|
| 138 km of Unpaved Roads | Total Asset Replacement Value | | |
| 20 km of Prime Roads | Category | Unit Cost | Replacement |
| 31 km of Sidewalks | | | Cost |
| | Paved | \$ 645/m | \$22, 111,245.00 |
| | Roads | | |
| | Unpaved | \$ 35/m | \$ 4,998,930.00 |
| | Roads | | |
| | Primed | \$ 118/m | \$2,134,620.00 |
| | Roads | | |
| | Sidewalks | \$350/m | \$10,757,561.50 |

\$40,002,356.50

2022 Dollars based on current project prices

Roads are a critical component of the provision of safe and efficient transportation services. They include all municipally owned and maintained roadways in addition to supporting roadside infrastructure. The roads are exposed to a number of stresses in our northern environment that contribute to accelerated deterioration, for example winter freeze thaw cycles and increased heavy traffic loading, which contributes to lower life expectancies than other assets.

The Average age of the road network is calculated based on the in service date. Below indicates the average age of the road network by category:

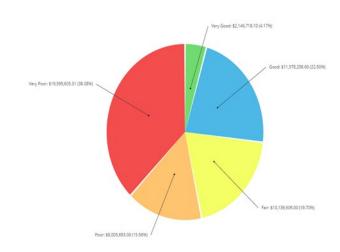

Paved Roads - 35 Years Old

Unpaved Roads – 23 Years Old

Primed Roads - 18 Years Old

Sidewalk - 33 Years Old

9.2 CONDITION OF THE INFRASTRUCTURE

| How is the C | Condition | Graded? |
|--------------|-----------|---------|
|--------------|-----------|---------|

| Very Good | New or like new condition |
|-----------|---------------------------|
| | |

Good In a good state of repair

Fair Some non-critical defects; some critical repairs in near term

Poor Some critical defects; many critical repairs in near term

Very Poor Many critical defects; immediate repair or replacement required.

Conditions of the Paved Roads and Gravel Roads are based on the 2016 Road Needs Study. Sidewalks are inspected annual with accordance with O.Reg 239/02.

9.3 TARGET CUSTOMER LEVELS OF SERVICES

- All new roads in the municipality are paved.
- Concrete curb and gutter and stormwater on all urban roads.
- Provide maintenance in accordance with minimum regulatory requirements and Town policy.
- All roads should be maintained in a state of good repair.

| Service attribute | Community levels of service (qualitative descriptions) | Technical levels of service Measure |
|------------------------------|--|--|
| Cost Efficient | 1.Providing an efficient transportation network for all modes | Dperating budget for transportation services (Roadway and sidewalk) Roadway and structure Reinvestment Rate |
| Accessibility | 1.Provide an adequate/accessible road network and adequate pedestrian access | 1. % warranted sidewalk needs vs total sidewalk network |
| Environmental Stewardship | 1.Providing a transportation network that is environmentally conscious | 1.Volume of salt applied to road/lane km (just km that are salted, not all km in town) |

9.4 INFRASTRUCTURE REINVESTMENT PLAN ROAD NETWORK

10 Year Reinvestment ¹³

| Forecasted Needs | Capital Plan ¹⁴ | Gap ¹⁵ |
|------------------|----------------------------|-------------------|
| \$ 21,684,800.50 | \$16,200,000.00 | \$ 5,484,800.50 |

¹³ Values are based off 2022 costs.

¹⁴ The Town of Cochrane is prepared to provide between \$1M to \$1.5M per year for road capital needs funded by tax rates, reserves, debt, government funding and others. This considers the Town goals to reach a \$3M general capital infrastructure reserve balance, less reliance on government funding, long term debt under \$2M and increase use of annual surplus.

¹⁵ This figure represents the difference between Forecasted Needs and Capital Plan, (provided that the Town continues to adhere to the 10-Year capital plan. To address the Town's backlog and forecasted needs, a number of options will need to be considered. Such options may include: alternative lifecycle costs (e.g. lining mains before complete replacement is required), new technology, new and creative revenue streams to offset costs, potential government funding, combining projects for cost efficiency and other.

Operations and Maintenance Expenses

| Annual Expenditure | % of Revised Needs |
|--------------------|--------------------|
| \$ 749,000.00 | 3.45% |

10 Year Reinvestment

Capital reinvestment of \$16.2M is planned over the next 10 years to maintain the infrastructure and bring to a state of good repair. To bring all assets to a similar state, the Town will need to work towards bridging the \$5.4M gap as further explained in Note 15.

Operations and Maintenance Expenses

Operation and Maintenance expenses of approximately \$749K per year or 3.45% of asset replacement needs are incurred to perform maintenance activities on the assets. The costs are considered as part of whole lifecycle strategies development and will continue to be optimized as asset management information and technology improve. Operations and maintenance activities include line painting, pot hole patching, street sweeping, crack sealing, road needs study (5 years) and asphalt replacement.

Lifecycle Costs

Some roads can benefit from operational work that could extent its useful life as opposed to full reconstruction. In the long run, annual treatments may be less expensive and invasive, and will be considered as part of the lifecycle strategies development process.

10 ASSET MANAGEMENT BRIDGES AND CULVERTS

10.1 STATE OF THE INFRASTRUCTURE BRIDGES AND CULVERTS

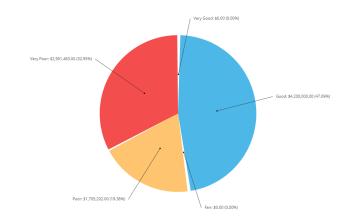

7 Bridges

The bridge infrastructure is currently in a good condition; however, the infrastructure is aging and beginning to impact the condition of the bridges.

The Town is proactively identifying how the infrastructure can be enhanced to mitigate the risk of the condition of the bridges.

Average Age of the Bridges is 54 Years Old. This is calculated based on the in-service date.

10.2 CONDITION OF THE INFRASTRUCTURE

Average condition is Good

| How is the Condition Graded? | | |
|---|---|--|
| Very Good | New or like new condition | |
| Good | In a good stare of repair | |
| Fair | Some non-critical defects; some critical repairs in the near term | |
| Poor | Some critical defects; many critical repairs in near term | |
| Very Poor | Many critical defects; immediate repair or replacement required. | |
| The condition of the bridges is based on age and the OSIM Bridge Inspections from 2022. | | |

10.3 TARGET CUSTOMER LEVELS OF SERVICES

- All bridges should be maintained to be safe for use.
- All bridges should be maintained in a state of good repair.

| Column 1 | Column 2 | Column 3 |

| Service | Community levels of service (qualitative | Technical levels of service (technical |
| attribute | descriptions) | metrics) |
| Scope | 1.Providing a transportation network with a | Percentage of bridges in the municipality |
| | reasonable level of connectivity | with loading or dimensional restrictions. |
| Quality | 1. Providing an operational bridge system | 1. For bridges in the municipality, the |
| | that is safe for drivers, pedestrians and | average bridge condition index value |
| | cyclists | 2. # of bridges with reduced load limits |
| | | 3. % compliance with Bridge Inspection |
| | | Standard |

10.4 INFRASTRUCTURE REINVESTMENT PLAN BRIDGES

10 Year Reinvestment ¹⁶

| Forecasted Needs | Capital Plan ¹⁷ | Gap ¹⁸ |
|------------------|----------------------------|-------------------|
| \$ 1,982,151.00 | \$1,900,000.00 | \$ 82,151.00 |

Operations and Maintenance Expenses

| Annual Expenditure | % of Revised Needs |
|--------------------|--------------------|
| \$ 38,000.00 | 1.92% |

10 Year Reinvestment

Capital reinvestment of \$1.9M is planned over the next 10 years to maintain the infrastructure and bring to a state of good repair. To bring all assets to a similar state, the Town will need to work towards bridging the \$82K gas as further explained in note 18.

Operations and Maintenance Expenses

Operation and Maintenance expenses of approximately \$38K per year or 1.92% of asset replacement needs are incurred to perform maintenance activities on the assets. The costs are considered as part of whole lifecycle strategies development and will continue to be optimized as asset management information and technology improve. Operations and maintenance activities include OSIM Bridge inspection (2 years), deck sweeping, bridge repairs and maintenance as required, debris clean up around structure, and maintenance to approaches.

Lifecycle Costs

Some assets can benefit from operational work that could extent its useful life as opposed to full reconstruction. In the long run, annual treatments may be less expensive and invasive, and will be considered as part of the lifecycle strategies development process.

¹⁶ Values are based off 2022 costs.

¹⁷ The Town of Cochrane is prepared to provide between \$100K to \$200K per year for bridge capital needs funded by tax rates, reserves, debt, government funding and others. This considers the Town goals to reach a \$ 3M general capital infrastructure reserve balance, less reliance on government funding, and increase use of annual surplus. Please note this includes a total of \$1.2M in load requirements.

¹⁸ The 10 Year Reinvestment needs does not include the replacement cost of culverts. We have inaccurate age data for the culverts. To address the Towns backlog and forecasted needs, a number of options will need to be considered such options may include alternative lifecycle costs, new technology, new and creative revenue streams to offset costs, potential government funding, combining projects for cost efficiency and others.

Water Mains

| Asset ID | Segment Name | Location | Location (From) | Location (To) | In-Service Date | Initial Quantity | Replacement Cost Age (Reporting Year) |
