A MESSAGE FROM THE OFFICE OF THE CLERK / RETURNING OFFICER

CANDIDATE QUESTIONS AND CLERK RESPONSES

In accordance with Clerk Procedure ME-2026-04, section 9.2, the Clerk may post candidate questions and responses on the municipal website to ensure fairness and consistency.

Question No. 10 – Submitted on October 15, 2026

Candidate Question:

If I understand correctly, we can request or receive a final copy of the 'who voted vs who didn't' list. Does this list also contain the IP address of the device the person voted from? If not, does the town have access to this data?

Clerk Answer:

The *Municipal Elections Act, 1996* does not require the Clerk to provide Candidates with a post-election list identifying which electors voted or did not vote. The voters' list and the applicable list of changes are provided in accordance with sections 23 and 27 of the Act.

Candidates are responsible for tracking voter participation for their own campaign purposes. During the voting period, Candidates may access the Intelivote Candidate Module, which allows them to view whether an elector has participated in the election. The module does not disclose how an elector voted.

The voters' list available through the Candidate Module does not display IP addresses. Intelivote maintains election activity logs that may include IP address information for monitoring and investigative purposes. Where an issue is identified that requires further review, Intelivote will contact the Clerk's Office to investigate as appropriate.

Information and records generated by the Clerk's Office, Intelivote and the Election Auditor are retained as part of the election record, as applicable.
